

# KHALED SAIFULLAH

## Technical Product Manager

+8801822612048   khaledsaifullah.me@gmail.com

Portfolio   Github.com/Khaled   LinkedIn.com/Khaled

Natun Bazar, Dhaka-1212, Bangladesh

## Summary

Technical Product Manager with **3+ years** delivering **enterprise SaaS, ERP, and digital-transformation** initiatives across **microfinance, education, and operational domains**. Proven track record owning **end-to-end product execution from discovery to launch, requirements definition, Agile delivery, API integrations, data migration, and stakeholder management**. Built and scaled platforms serving **650,000+ users** and a **\$60M loan-portfolio tracker**, blending product thinking, business-analysis rigor, and hands-on technical execution **across cross-functional teams**.

## Core Competencies

**Product Management** – Strategy, roadmapping, backlog, user stories, Agile delivery

**Business Analysis** – BRD/PRD/SRS, requirements, UML/BPMN, process mapping, gap analysis

**Project Management** – SDLC, Scrum, stakeholder management, risk management, UAT

**Enterprise Systems & SaaS** – ERP, SaaS implementation, API integration, data migration, workflows

**Data & Analytics** – SQL, Power BI, Excel, Python, KPI reporting, dashboards

**UI/UX** – Figma, wireframing, prototyping, user journeys, usability testing

**QA** – Functional & API testing, test cases, defect management

**Tools** – Jira, Confluence, ClickUp, Git, Lucidchart, Notion

**Programming** – PHP, Java, JavaScript, C/C++, HTML, CSS

**Client Management** – SaaS onboarding, training, change management, adoption, support

## Experience

### Enterprise Engagement Consultant (Hybrid, Full Time)

April 2026 - Present

JustGo Technologies Ltd.

White Plains, New York, USA (Operating remotely from Bangladesh)

- Led end-to-end **SaaS onboarding** and implementation for **National Governing Bodies** across the US, UK, EU, and Australia.
- Implemented SaaS solutions** by translating requirements into specs, workflows, and customer-specific configurations.
- Coordinated Product, Engineering, QA, and Support teams to ensure timely delivery.
- Managed **project timelines, risks, dependencies, & stakeholder communications** across multiple **concurrent implementations**.
- Performed pre-import **data analysis to validate, map, and ensure accurate**, complete migration without **data loss or scope gaps**.
- Designed **dashboards & reports** to deliver **operational visibility**, enabling **data-driven decision-making** & performance tracking.
- Led **UAT, training, & user guides** to drive **successful adoption**, and supported **integration with external systems**.
- Acted as **primary POC** for **continuous client engagement** and platform optimization, with exposure to **upselling opportunities**.

### Notable Projects

- Implemented sports membership platforms** for **Cycling Ireland** and **Squash Ireland**, covering member management, credentialing, event registration, reporting, and data migration

### Technical Product Manager (Full Time)

September 2025 - March 2026

Padakhep Manabik Unnayan Kendra.

Dhaka, Bangladesh

- Translated **stakeholder needs into user stories, workflows, and BRDs/FRDs** to guide development.
- Managed **API integrations** across organizations **MIS, FIS, and e-commerce** ecosystems.
- Lead **UAT, test case design, defect triage, and QA oversight**, ensuring **timely and quality releases**.
- Optimized and stabilized** the legacy **software** to ensure **seamless, uninterrupted support** across all **nationwide branches**.
- Designed & delivered **innovative and efficient solutions (web & mobile application)** to improve efficiency and risk control.
- Conducted **backlog grooming, sprint planning, and cross-functional alignment** under agile practices.
- Performed **process mapping, gap analysis, and change impact assessments** to streamline operations.
- Enhanced **UI and optimized user flows** to deliver a seamless and intuitive experience.
- Supported **release documentation, user training, and adoption monitoring** for smooth rollouts.
- Streamlined interoperability** between **multiple organizational platforms** for **cohesive operations**.
- Ensured **compliance** across system design, reporting, and operations.

### Notable Projects

- Overdue Tracker** – Collections, overdue tracking, monitoring, and action management for a \$60M portfolio.
- Microfinance System** – Enabling end-to-end process management for 9,500+ staff and 650,000+ users, supporting large-scale financial operations and service delivery.
- Microfinance eCommerce** – Loan/cash-based purchasing system integrated with core microfinance and seller incentive workflows.
- Pharmacy Management System** – Inventory, prescription, rewards, billing, supplier, and sales management.
- Retail Shop Management System** – POS billing, product and inventory management, customer tracking, and sales reporting.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                              |
